**Abstract of JP 2004155773 (A)**

**PROBLEM TO BE SOLVED:** To provide a method for producing an unstable amorphous benzimidazole-based compound having proton pump-inhibiting action and prepare a stable solid pharmaceutical formulation containing the same. ; **SOLUTION:** The stable solid pharmaceutical formulation contains granules prepared by blending a nontoxic base such as a basic inorganic salt, or the like, with the amorphous benzimidazole-based compound, applying an intermediate coating layer on an active ingredient-containing layer and coating the same with an enteric coating layer, a controlled release layer, or the like. ; **COPYRIGHT:** (C)2004,JPO
